

POP IT

When popped daily, PrEP can prevent HIV by 99%

DAILY!

What is PrEP?

PrEP (Pre-Exposure Prophylaxis) is a once-daily pill that reduces your chances of getting HIV through sex by 99%.

How does PrEP work?

- PrEP stops the HIV virus from spreading in your body.
- PrEP reaches maximum protection after 7 days of daily use when HIV risk is related to anal sex and after 21 days when HIV risk is related to vaginal sex.
- PrEP is even more effective at preventing HIV when used with other prevention tools like condoms.

Who is PrEP for?

- People who are sexually active.
 - People who inject drugs.
 - Anyone at risk of getting HIV.
- Ask your provider if PrEP is right for you!

How do I get on PrEP?

Avita Pharmacy provides friendly, compassionate, and expert pharmacy care.

- Easy to fill your prescription online or at a local Avita Pharmacy.
- "Text to refill" reminders so you never miss a dose!
- PrEP prescription delivery available for most patients.
- Financial assistance support.
- Culturally competent care.
